Subject index

Acetylpyridine
A pH-dependent surface-enhanced Raman spectroscopy investigation of the adsorption of 3-acetylpyridine (Pofahl et al.) 329
Acid media
Experimental evidence demonstrating the occurrence of reduction processes of ClO_4^- ions in an acid medium at platinized platinum electrodes (Horányi, Bakos) 727
Adsorption
A "macroscopic" approach to the adsorption potential shift at the air–solution interface (Koczorowski et al.) 25
Double-layer dynamics in the adsorption of tetrabutyl ammonium ions at the mercury–water interface. I: Survey (Wandlowski, De Levie) 103
An analysis of adsorption and kinetic effects in cesium salt solutions on the mercury–water interface within the framework of new electrostatic models (Damaskin, Safonov) 139
Evidence for adsorption of alkali ions at the mercury–electrolyte interface from their mixed aqueous chloride solutions at 1 M ionic strength (Baars et al.) 171
Adsorption of pyridine at the Au(210)–solution interface (Yang et al.) 259
A study of *p*-toluenesulphonate anion adsorption at the gold (311) single crystal electrode (Skołuda, Dutkiewicz) 279
Specific adsorption at Au(111) electrodes studied by second harmonic generation (Pettinger et al.) 289
A pH-dependent surface-enhanced Raman spectroscopy investigation of the adsorption of 3-acetylpyridine (Pofahl et al.) 329
Adsorption of anions on ultra-thin metal deposits on single-crystal electrodes. II: Voltammetric and radiochemical study of bisulfate adsorption on Pt(111) and Pt(poly) electrodes containing copper adatoms (Varga et al.) 453
Study of the charge displacement at constant potential during CO adsorption on Pt(110) and Pt(111) electrodes in contact with a perchloric acid solution (Clavilier et al.) 489
The effect of specific adsorption of ions and underpotential deposition of copper on the electro-oxidation of methanol on platinum single-crystal surfaces (Markovic, Ross) 499
Effect of anions and pH on the adsorption and oxidation of methanol on a platinum electrode (Sobkowski et al.) 529
In-situ studies of adsorption of organic compounds on platinum electrodes (Bockris, Jeng) 541
Voltammetric approach to multicomponent electrochemical systems at platinum electrode surfaces (Arévalo et al.) 595
Explicit finite-difference digital simulation of the effects of rate-controlled product adsorption or deposition in double-potential-step chronocoulometry (Engelman, Evans) 739
Alkali ions
Evidence for adsorption of alkali ions at the mercury–electrolyte interface from their mixed aqueous chloride solutions at 1 M ionic strength (Baars et al.) 171
Alkaline solutions
Hydrogen adsorption on single-crystal platinum electrodes in alkaline solutions (Marinković et al.) 433
Aminoheptyltriazole
Applicability of multistep potentiostatic pulse measurements in inhibitor research (König et al.) 615

Anderson–Newns model
A model for the coadsorption of ions (Newmark, Schmickler) 159
Anthraquinone
Voltammetry and in-situ Fourier transform IR spectroscopy of two anthraquinone disulfonates adsorbed on graphite electrodes (Zhang, Anson) 945
ATR
ATR–IR studies of CO adsorption from solutions (Zippel et al.) 521

Bisulfate
Adsorption of anions on ultra-thin metal deposits on single-crystal electrodes. II: Voltammetric and radiochemical study of bisulfate adsorption on Pt(111) and Pt(poly) electrodes containing copper adatoms (Varga et al.) 453
Born equation
Determination of the surface potentials of solvents (Krishtalik et al.) 1

Cadmium
Temperature dependence of cadmium adsorption on oxides. Part 2. Thermodynamics and microcalorimetry of the $Cd(NO_3)_2$ rutile system (Fokkink et al.) 187
Capacity–potential curves
Superficial structure of Au(110) at the electrochemical interface (Hamelin) 247
Carbon monoxide
Study of the charge displacement at constant potential during CO adsorption on Pt(110) and Pt(111) electrodes in contact with a perchloric acid solution (Clavilier et al.) 489
Cesium
An analysis of adsorption and kinetic effects in cesium salt solutions on the mercury–water interface within the framework of new electrostatic models (Damaskin, Safonov) 139
Charge displacement
Study of the charge displacement at constant potential during CO adsorption on Pt(110) and Pt(111) electrodes in contact with a perchloric acid solution (Clavilier et al.) 489
Charge transport
The non-metallic character of solvated conducting polymers (Doblhofer) 1015
Chemically modified electrodes
Sensitive amperometric detection of glucose by reversed phase liquid chromatography at a Prussian Blue chemically modified electrode of novel construction (Zhou, Wang) 1029
Chlorate ions
Experimental evidence demonstrating the occurrence of reduction processes of ClO_4^- ions in an acid medium at platinized platinum electrodes (Horányi, Bakos) 727
Chloride ions
Electrohydrodynamic impedance study of anodically formed salt films on iron in chloride solutions (West et al.) 693
Chronocoulometry
Explicit finite-difference digital simulation of the effects of rate-controlled product adsorption or deposition in double-potential-step chronocoulometry (Engelman, Evans) 739
Coadsorption
A model for the coadsorption of ions (Newmark, Schmickler) 159
Concentration profiles
Simulated concentration profiles of redox centers in thin polymer films: oxidation-state dependence of diffusion and partitioning between film and solution (Fritsch-Faules, Faulkner) 997
Conducting polymers
The non-metallic character of solvated conducting polymers (Doblhofer) 1015
Copper
An in situ scanning tunnelling microscopy study of bulk copper deposition and the influence of an organic additive (Nichols et al.) 381
Adsorption of anions on ultra-thin metal deposits on single-crystal electrodes. II: Voltammetric and radiochemical study of bisulfate adsorption on Pt(111) and Pt(poly) electrodes containing copper adatoms (Varga et al.) 453
Applicability of multistep potentiostatic pulse measurements in inhibitor research (König et al.) 615
Current–potential characteristics
Theory of electron transfer processes via chemisorbed intermediates. Part II. Current–potential characteristics (Mishra et al.) 801
Cyclam
Effect of solvent on the kinetic and thermodynamic redox properties of Ni(III)/Ni(II) in tetraazamacrocyclic complexes with pen-

dant amino group and cyclam studied on a glassy carbon electrode (Taraszewska, Rosłonek) 985
Cyclic voltammetry
Superficial structure of Au(110) at the electrochemical interface (Hamelin) 247
Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals (Feddrix et al.) 419
Electrochemical oxidation of *cis*-[$Mo(CO)_4$-(2,2′-bipyridine)] coupled with ligand substitution reactions in non-aqueous solvents (Hanzlík et al.) 831

Deposition
Explicit finite-difference digital simulation of the effects of rate-controlled product adsorption or deposition in double-potential-step chronocoulometry (Engelman, Evans) 739
Differential electrode capacity
Differential and thermodynamic electrode capacity—impedance control of identity (Grafov, Damaskin) 129
Digital simulations
Explicit finite-difference digital simulation of the effects of rate-controlled product adsorption or deposition in double-potential-step chronocoulometry (Engelman, Evans) 739
Simulated concentration profiles of redox centers in thin polymer films: oxidation-state dependence of diffusion and partitioning between film and solution (Fritsch-Faules, Faulkner) 997
Dimerization
Application of rapid scan cyclic voltammetry to a study of the oxidation and dimerization of *N*,*N*-dimethylaniline in acetonitrile (Yang et al.) 913
Electrochemistry of synthetic analogues of NAD dimers (Anne et al.) 959
Dimethylaniline
Application of rapid scan cyclic voltammetry to a study of the oxidation and dimerization of *N*,*N*-dimethylaniline in acetonitrile (Yang et al.) 913
Dimethylformamide
Self-exchange electron transfer rate constants and reorganization energies for some aromatic compounds in *N*,*N*-dimethylformamide determined by electron spin resonance (Larsen et al.) 971
Double-layer capacitance
Structure of interphases of low melting point salts and protonic hydrates with mercury and gold in relation to double-layer capacitance behaviour (Conway et al.) 201
Double-layer structure
Solvent effects in the electric double-layer structure for gallium and gallium-like metals (Bagotskaya, Kazarinov) 225
Dynamics
Double-layer dynamics in the adsorption of tetrabutyl ammonium ions at the mercury–water interface. I: Survey (Wandlowski, De Levie) 103

Electrified interphases
A thermodynamic interpretation of the heterogeneity effects on phase transitions at electrified interphases (Nikitas) 59
Electrocatalysis
An investigation of the electrocatalytic behaviour of gold in aqueous media (Burke, Lee) 637
The non-metallic character of solvated conducting polymers (Doblhofer) 1015
Electrochromism
Anodic stability and electrochromism of electrodeposited ruthenium–iridium coatings on titanium (Vuković et al.) 663
Electrohydrodynamic impedance
Electrohydrodynamic impedance study of anodically formed salt films on iron in chloride solutions (West et al.) 693
Electronic energy
Systematic trends in the crystal face specificity of interfacial parameters: the cases of Ag and Au (Trasatti) 237
Electron spin resonance
Self-exchange electron transfer rate constants and reorganization energies for some aromatic compounds in *N*,*N*-dimethylformamide determined by electron spin resonance (Larsen et al.) 971
Electron transfer
On the significance of the simultaneity of electron transfer and cooperation in electrochemistry (Tributsch) 783
Theory of electron transfer processes via chemisorbed intermediates. Part II. Current–potential characteristics (Mishra et al.) 801
Kinetic parameters for heterogeneous electron transfer to tris(acetylacetonato)manga-

nese(III) and tris(acetylacetonato)iron(III) in aproptic solvents (Fawcett, Opallo) 815
Self-exchange electron transfer rate constants and reorganization energies for some aromatic compounds in *N,N*-dimethylformamide determined by electron spin resonance (Larsen et al.) 971

Electroreflectance
Electroreflectance study of redox reaction of heptylviologen at a silver electrode (Wang et al.) 925

Electrostatic models
An analysis of adsorption and kinetic effects in cesium salt solutions on the mercury–water interface within the framework of new electrostatic models (Damaskin, Safonov) 139

Ellipsometry
Ellipsometry of nickel hydroxide electrodes formed by ex situ chemical precipitation. Potential routine and time effects (Zerbino et al.) 675

Europium
Influence of reactant size on electrochemical kinetics of europium(III)/europium(II) complexes with selected chelating ligands in the presence of adsorbed aliphatic alcohols (Hai et al.) 845

Explicit finite differences
Explicit finite-difference digital simulation of the effects of rate-controlled product adsorption or deposition in double-potential-step chronocoulometry (Engelman, Evans) 739

Formaldehyde
Oxidation of formaldehyde in an alkaline medium on a polycrystalline platinum electrode (Olivi et al.) 583

Fourier transform IR
Voltammetry and in-situ Fourier transform IR spectroscopy of two anthraquinone disulfonates adsorbed on graphite electrodes (Zhang, Anson) 945

Gallium
Solvent effects in the electric double-layer structure for gallium and gallium-like metals (Bagotskaya, Kazarinov) 225

Glassy carbon electrodes
Surface topography of anodically treated glassy carbon electrodes (Firouzi et al.) 369

Glucose
Sensitive amperometric detection of glucose by reversed phase liquid chromatography at a Prussian Blue chemically modified electrode of novel construction (Zhou, Wang) 1029

Gold
Structure of interphases of low melting point salts and protonic hydrates with mercury and gold in relation to double-layer capacitance behaviour (Conway et al.) 201
Systematic trends in the crystal face specificity of interfacial parameters: the cases of Ag and Au (Trasatti) 237
Superficial structure of Au(110) at the electrochemical interface (Hamelin) 247
Adsorption of pyridine at the Au(210)–solution interface (Yang et al.) 259
A study of *p*-toluenesulphonate anion adsorption at the gold (311) single crystal electrode (Skołuda, Dutkiewicz) 279
Specific adsorption at Au(111) electrodes studied by second harmonic generation (Pettinger et al.) 289
An investigation of the electrocatalytic behaviour of gold in aqueous media (Burke, Lee) 637

Graphite electrodes
Voltammetry and in-situ Fourier transform IR spectroscopy of two anthraquinone disulfonates adsorbed on graphite electrodes (Zhang, Anson) 945

Heptylviologen
Electroreflectance study of redox reaction of heptylviologen at a silver electrode (Wang et al.) 925

Heterogeneity effects
A thermodynamic interpretation of the heterogeneity effects on phase transitions at electrified interphases (Nikitas) 59

Hydration force microscopy
Hydration force microscopy as a new option for studies of solid–liquid interfaces: some theoretical considerations (Cevc, Kornyshev) 407

Hydrogen
The hydrogen evolution reaction on amorphous Pd–Si alloys (Tremiliosi-Filho et al.) 751

Hydrogen adsorption
Hydrogen adsorption on single-crystal platinum electrodes in alkaline solutions (Marinković et al.) 433
Electroreduction of nitrate and nitrite anions on platinum metals: a model process for elucidating the nature of the passivation by hydrogen adsorption (Petrii, Safonova) 897

Impedance control
Differential and thermodynamic electrode capacity—impedance control of identity (Grafov, Damaskin) 129
IMPS
Surface recombination at the n-$Ga_{1-x}Al_x$As–electrolyte interface: a study by intensity-modulated photocurrent spectroscopy (Hutton, Peter) 351
Inhibitors
Applicability of multistep potentiostatic pulse measurements in inhibitor research (König et al.) 615
Interface
Potential distribution in the solution interface of a scanning tunneling microscope (Henderson, Chan) 395
Interfaces
An analysis of adsorption and kinetic effects in cesium salt solutions on the mercury–water interface within the framework of new electrostatic models (Damaskin, Safonov) 139
Ion transfer
Effect of temperature on the ion transfer across an interface between two immiscible electrolyte solutions: Ion transfer dynamics (Wandlowski et al.) 765
Iron
Electrohydrodynamic impedance study of anodically formed salt films on iron in chloride solutions (West et al.) 693
IR spectroscopy
ATR–IR studies of CO adsorption from solutions (Zippel et al.) 521
Ising lattices
On the thermodynamic properties of several two-dimensional Ising lattices (Retter) 81
Isoquinoline
On the influence of molecular structure on the orientation and the occurrence of phase transitions in organic adsorbed layers at the mercury–water interface (Buess-Herman et al.) 91

Kinetics
An analysis of adsorption and kinetic effects in cesium salt solutions on the mercury–water interface within the framework of new electrostatic models (Damaskin, Safonov) 139
Influence of reactant size on electrochemical kinetics of europium(III)/europium(II) complexes with selected chelating ligands in the presence of adsorbed aliphatic alcohols (Hai et al.) 845

Linear optics
The use of optics for understanding the electrochemical interface (Chao et al.) 313
Lippmann equation
Surface energies of solid electrodes (Heusler, Pietrucha) 339
Lithium
A simple percolating fluid model for the morphology of the passive layer formed on a lithium anode (Armand et al.) 707
Low energy electron diffraction
Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals (Feddrix et al.) 419
Low melting point salts
Structure of interphases of low melting point salts and protonic hydrates with mercury and gold in relation to double-layer capacitance behaviour (Conway et al.) 201
Low temperature measurements
The evaluation of rate constants for rapid electrode reactions using microelectrode voltammetry: virtues of measurements at lower temperatures (Safford, Weaver) 857

Macroscopic parameters
A "macroscopic" approach to the adsorption potential shift at the air–solution interface (Koczorowski et al.) 25
Mercury
Double-layer dynamics in the adsorption of tetrabutyl ammonium ions at the mercury–water interface. I: Survey (Wandlowski, De Levie) 103
An analysis of adsorption and kinetic effects in cesium salt solutions on the mercury–water interface within the framework of new electrostatic models (Damaskin, Safonov) 139
Evidence for adsorption of alkali ions at the mercury–electrolyte interface from their

mixed aqueous chloride solutions at 1 M ionic strength (Baars et al.) 171
Structure of interphases of low melting point salts and protonic hydrates with mercury and gold in relation to double-layer capacitance behaviour (Conway et al.) 201

Methanol
Surface potentials of water, methanol and water + methanol mixtures (Barraclough et al.) 9
Effect of anions and pH on the adsorption and oxidation of methanol on a platinum electrode (Sobkowski et al.) 529

Microcalorimetry
Temperature dependence of cadmium adsorption on oxides. Part 2. Thermodynamics and microcalorimetry of the $Cd(NO_3)_2$ rutile system (Fokkink et al.) 187

Microelectrode
Microelectrode studies without supporting electrolyte: model and experimental comparison for singly and multiply charged ions (Cooper et al.) 877

Microelectrode voltammetry
The evaluation of rate constants for rapid electrode reactions using microelectrode voltammetry: virtues of measurements at lower temperatures (Safford, Weaver) 857

$Mo(CO)_4$(2,2′-bipyridine)
Electrochemical oxidation of *cis*-[$Mo(CO)_4$-(2,2′-bipyridine)] coupled with ligand substitution reactions in non-aqueous solvents (Hanzlík et al.) 831

Molecular interactions
On the influence of molecular structure on the orientation and the occurrence of phase transitions in organic adsorbed layers at the mercury–water interface (Buess-Herman et al.) 91

Molecular orientation
On the influence of molecular structure on the orientation and the occurrence of phase transitions in organic adsorbed layers at the mercury–water interface (Buess-Herman et al.) 91
Surface electrochemistry and molecular orientation: studies of pyridyl hydroquinones adsorbed at Pt(111) by cyclic voltammetry, Auger electron spectroscopy and electron energy loss spectroscopy (Zapien et al.) 469

Multicomponent systems
Voltammetric approach to multicomponent electrochemical systems at platinum electrode surfaces (Arévalo et al.) 595

NAD
Electrochemistry of synthetic analogues of NAD dimers (Anne et al.) 959

Nickel
Effect of solvent on the kinetic and thermodynamic redox properties of Ni(III)/Ni(II) in tetraazamacrocyclic complexes with pendant amino group and cyclam studied on a glassy carbon electrode (Taraszewska, Rosłonek) 985

Nickel hydroxide
Ellipsometry of nickel hydroxide electrodes formed by ex situ chemical precipitation. Potential routine and time effects (Zerbino et al.) 675

Nitrobenzene
Effect of temperature on the ion transfer across an interface between two immiscible electrolyte solutions: Ion transfer dynamics (Wandlowski et al.) 765

Non-linear optics
The use of optics for understanding the electrochemical interface (Chao et al.) 313

Optics
The use of optics for understanding the electrochemical interface (Chao et al.) 313

Organic additive
An in situ scanning tunnelling microscopy study of bulk copper deposition and the influence of an organic additive (Nichols et al.) 381

Oxidation
The effect of specific adsorption of ions and underpotential deposition of copper on the electro-oxidation of methanol on platinum single-crystal surfaces (Markovic, Ross) 499
Effect of anions and pH on the adsorption and oxidation of methanol on a platinum electrode (Sobkowski et al.) 529
Oxidation of formaldehyde in an alkaline medium on a polycrystalline platinum electrode (Olivi et al.) 583
Electrochemical oxidation of *cis*-[$Mo(CO)_4$-(2,2′-bipyridine)] coupled with ligand substi-

tution reactions in non-aqueous solvents (Hanzlík et al.) 831
Application of rapid scan cyclic voltammetry to a study of the oxidation and dimerization of *N,N*-dimethylaniline in acetonitrile (Yang et al.) 913
Oxide adsorption
Temperature dependence of cadmium adsorption on oxides. Part 2. Thermodynamics and microcalorimetry of the $Cd(NO_3)_2$ rutile system (Fokkink et al.) 187

Partial charge transfer
Differential and thermodynamic electrode capacity—impedance control of identity (Grafov, Damaskin) 129
Passive layer
A simple percolating fluid model for the morphology of the passive layer formed on a lithium anode (Armand et al.) 707
Pd–Si Alloys
The hydrogen evolution reaction on amorphous Pd–Si alloys (Tremiliosi-Filho et al.) 751
Pendant amino group
Effect of solvent on the kinetic and thermodynamic redox properties of Ni(III)/Ni(II) in tetraazamacrocyclic complexes with pendant amino group and cyclam studied on a glassy carbon electrode (Taraszewska, Rosłonek) 985
Perchloric acid
Study of the charge displacement at constant potential during CO adsorption on Pt(110) and Pt(111) electrodes in contact with a perchloric acid solution (Clavilier et al.) 489
Percolating fluid model
A simple percolating fluid model for the morphology of the passive layer formed on a lithium anode (Armand et al.) 707
Phase transitions
A thermodynamic interpretation of the heterogeneity effects on phase transitions at electrified interphases (Nikitas) 59
Photoelectrochemistry
Surface recombination at the n-$Ga_{1-x}Al_x$As–electrolyte interface: a study by intensity-modulated photocurrent spectroscopy (Hutton, Peter) 351
Platinum
Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals (Feddrix et al.) 419
The effect of specific adsorption of ions and underpotential deposition of copper on the electro-oxidation of methanol on platinum single-crystal surfaces (Markovic, Ross) 499
In-situ studies of adsorption of organic compounds on platinum electrodes (Bockris, Jeng) 541
Voltammetric approach to multicomponent electrochemical systems at platinum electrode surfaces (Arévalo et al.) 595
Experimental evidence demonstrating the occurrence of reduction processes of ClO_4^- ions in an acid medium at platinized platinum electrodes (Horányi, Bakos) 727
Electroreduction of nitrate and nitrite anions on platinum metals: a model process for elucidating the nature of the passivation by hydrogen adsorption (Petrii, Safonova) 897
Platinum electrode
Effect of anions and pH on the adsorption and oxidation of methanol on a platinum electrode (Sobkowski et al.) 529
Oxidation of formaldehyde in an alkaline medium on a polycrystalline platinum electrode (Olivi et al.) 583
Platinum electrodes
Hydrogen adsorption on single-crystal platinum electrodes in alkaline solutions (Marinković et al.) 433
Potentiostatic pulse measurements
Applicability of multistep potentiostatic pulse measurements in inhibitor research (König et al.) 615
Prussian Blue
Sensitive amperometric detection of glucose by reversed phase liquid chromatography at a Prussian Blue chemically modified electrode of novel construction (Zhou, Wang) 1029
Pyridine
Adsorption of pyridine at the Au(210)–solution interface (Yang et al.) 259
Pyridyl hydroquinones
Surface electrochemistry and molecular orientation: studies of pyridyl hydroquinones adsorbed at Pt(111) by cyclic voltammetry, Auger electron spectroscopy and electron energy loss spectroscopy (Zapien et al.) 469

Quartz oscillators
Surface energies of solid electrodes (Heusler, Pietrucha) 339

Rapid electrode reactions
The evaluation of rate constants for rapid electrode reactions using microelectrode voltammetry: virtues of measurements at lower temperatures (Safford, Weaver) 857
Rapid scan cyclic voltammetry
Application of rapid scan cyclic voltammetry to a study of the oxidation and dimerization of *N*,*N*-dimethylaniline in acetonitrile (Yang et al.) 913
Redox
Electroreflectance study of redox reaction of heptylviologen at a silver electrode (Wang et al.) 925
Electrochemistry of synthetic analogues of NAD dimers (Anne et al.) 959
Effect of solvent on the kinetic and thermodynamic redox properties of Ni(III)/Ni(II) in tetraazamacrocyclic complexes with pendant amino group and cyclam studied on a glassy carbon electrode (Taraszewska, Rosłonek) 985
Reduction
Electroreduction of nitrate and nitrite anions on platinum metals: a model process for elucidating the nature of the passivation by hydrogen adsorption (Petrii, Safonova) 897
Reduction processes
Experimental evidence demonstrating the occurrence of reduction processes of ClO_4^- ions in an acid medium at platinized platinum electrodes (Horányi, Bakos) 727
Reorganization energies
Self-exchange electron transfer rate constants and reorganization energies for some aromatic compounds in *N*,*N*-dimethylformamide determined by electron spin resonance (Larsen et al.) 971
Reversed phase liquid chromatography
Sensitive amperometric detection of glucose by reversed phase liquid chromatography at a Prussian Blue chemically modified electrode of novel construction (Zhou, Wang) 1029
Ruthenium–iridium
Anodic stability and electrochromism of electrodeposited ruthenium–iridium coatings on titanium (Vuković et al.) 663
Rutile
Temperature dependence of cadmium adsorption on oxides. Part 2. Thermodynamics and microcalorimetry of the $Cd(NO_3)_2$ rutile system (Fokkink et al.) 187
Scanning tunneling microscope
Potential distribution in the solution interface of a scanning tunneling microscope (Henderson, Chan) 395
Scanning tunnelling microscopy
An in situ scanning tunnelling microscopy study of bulk copper deposition and the influence of an organic additive (Nichols et al.) 381
Second harmonic generation
Specific adsorption at Au(111) electrodes studied by second harmonic generation (Pettinger et al.) 289
Silver
Systematic trends in the crystal face specificity of interfacial parameters: the cases of Ag and Au (Trasatti) 237
Silver electrode
Electroreflectance study of redox reaction of heptylviologen at a silver electrode (Wang et al.) 925
Solid electrodes
Surface energies of solid electrodes (Heusler, Pietrucha) 339
Solvent effects
Solvent effects in the electric double-layer structure for gallium and gallium-like metals (Bagotskaya, Kazarinov) 225
Spectroscopy
Voltammetry and in-situ Fourier transform IR spectroscopy of two anthraquinone disulfonates adsorbed on graphite electrodes (Zhang, Anson) 945
Surface electrochemistry
Surface electrochemistry and molecular orientation: studies of pyridyl hydroquinones adsorbed at Pt(111) by cyclic voltammetry, Auger electron spectroscopy and electron energy loss spectroscopy (Zapien et al.) 469
Surface energy
Surface energies of solid electrodes (Heusler, Pietrucha) 339
Surface-enhanced Raman spectra
A pH-dependent surface-enhanced Raman spectroscopy investigation of the adsorption of 3-acetylpyridine (Pofahl et al.) 329
Surface potentials
Determination of the surface potentials of solvents (Krishtalik et al.) 1
Surface potentials of water, methanol and water + methanol mixtures (Barraclough et al.) 9

Surface recombination
Surface recombination at the n-$Ga_{1-x}Al_x$ As–electrolyte interface: a study by intensity-modulated photocurrent spectroscopy (Hutton, Peter) 351

Tetraazamacrocyclic complexes
Effect of solvent on the kinetic and thermodynamic redox properties of Ni(III)/Ni(II) in tetraazamacrocyclic complexes with pendant amino group and cyclam studied on a glassy carbon electrode (Taraszewska, Rosłonek) 985

Tetrabutyl ammonium
Double-layer dynamics in the adsorption of tetrabutyl ammonium ions at the mercury–water interface. I: Survey (Wandlowski, De Levie) 103

Thermodynamic electrode capacity
Differential and thermodynamic electrode capacity—impedance control of identity (Grafov, Damaskin) 129

Thermodynamic interpretations
A thermodynamic interpretation of the heterogeneity effects on phase transitions at electrified interphases (Nikitas) 59

Thermodynamic properties
On the thermodynamic properties of several two-dimensional Ising lattices (Retter) 81

Thermodynamics
Temperature dependence of cadmium adsorption on oxides. Part 2. Thermodynamics and microcalorimetry of the $Cd(NO_3)_2$ rutile system (Fokkink et al.) 187

Thin polymer films
Simulated concentration profiles of redox centers in thin polymer films: oxidation-state dependence of diffusion and partitioning between film and solution (Fritsch-Faules, Faulkner) 997

Three-dimensional lattice
A three-dimensional lattice model of TIP4P water molecules and of polar monomeric and dimeric solute molecules against a charged wall (Guidelli, Aloisi) 39

TIP4P
A three-dimensional lattice model of TIP4P water molecules and of polar monomeric and dimeric solute molecules against a charged wall (Guidelli, Aloisi) 39

Titanium
Anodic stability and electrochromism of electrodeposited ruthenium–iridium coatings on titanium (Vuković et al.) 663

Toluenesulphonate
A study of *p*-toluenesulphonate anion adsorption at the gold (311) single crystal electrode (Skołuda, Dutkiewicz) 279

Topography
Surface topography of anodically treated glassy carbon electrodes (Firouzi et al.) 369

Transport-limited voltammetry
Microelectrode studies without supporting electrolyte: model and experimental comparison for singly and multiply charged ions (Cooper et al.) 877

Tris(acetylacetonato)iron(III)
Kinetic parameters for heterogeneous electron transfer to tris(acetylacetonato)manganese(III) and tris(acetylacetonato)iron(III) in aproptic solvents (Fawcett, Opallo) 815

Tris(acetylacetonato)manganese(III)
Kinetic parameters for heterogeneous electron transfer to tris(acetylacetonato)manganese(III) and tris(acetylacetonato)iron(III) in aproptic solvents (Fawcett, Opallo) 815

Ultra-thin metal
Adsorption of anions on ultra-thin metal deposits on single-crystal electrodes. II: Voltammetric and radiochemical study of bisulfate adsorption on Pt(111) and Pt(poly) electrodes containing copper adatoms (Varga et al.) 453

Underpotential deposition
The effect of specific adsorption of ions and underpotential deposition of copper on the electro-oxidation of methanol on platinum single-crystal surfaces (Markovic, Ross) 499
